

We are currently putting together material from the whole Splash period (1969-1979). It will take some time. Among other things there are quite a number of live recordings that must be edited.

Our objective is to get a CD box with Splash recordings where sound quality will be considerably better than at many of the files you can listen to on this web site.

In the meantime we are issuing all published Splash productions on this home page. Just click further to "Produktionssidan" (production page) and scroll down to "Produktionsuppgifter" (production information) and you will find the tunes.

Please help yourself!
